Trenton is now 4-years-old....he has grown and developed in the 2 years he has been in our family. When he arrived, he could not hold his head up; he rarely made eye contact and he was very fearful. In our big family of six boys, his first few weeks with us were pretty miserable for him!

Fast forward to today, he loves his dad and brothers, holds his head up, looks people in the eye and gives them his signature smile.

Trenton is so content and happy despite his limitations; even though he can’t walk or talk, he shows love, feels love, and gives love. He is a rockstar!

Trenton needs specialized equipment to move: wheelchair, shower chair, specialized seating systems. But his favorite is his Mustang Gait Trainer that allows him to WALK! His physical therapist says she has never seen a child ‘take off’ as he did, so happy to be moving himself!

To donate (in any amount!), go to the FOCUS website OR send a check to FOCUS, 3825 Presidential Pkwy, #103, Atlanta, GA 30340 (we love checks, no fees!). Be sure to write “Fund A Need” in the Comments – and feel free to include a message to Rockstar Trenton!

About Gait Trainers. Children with cerebral palsy often use gait trainers to augment their mobility. They provide proper positioning and support for children while they learn the skills of stepping / walking.

For questions about Fund A Need, please contact Lucy Cusick at lucy@focus-ga.org
